(54) SECURITY ISSUING SYSTEM AND SECURITY

(57)Abstract:

PROBLEM TO BE SOLVED: To lessen the burden of work while enhancing the quality of an issued security by integrating the entire process for printing and issuing a security, i. e., a bill or a check, thereby issuing a security efficiently.

SOLUTION: In the security print control executed by a CPU 2, a request file (including various item data of bank code, branch code, account code, ID, client name, etc.) stored in a memory 6 is acquired and validity of various item data in the request file is ascertained. After a various data corresponding to the various item data is acquired from a relevant file in the memory 6 and stored in the issue file in an RAM 5, a signature image corresponding to a signature file in the memory 6 is acquired and delivery of bill/check print data to an MICR toner printer 20 is started. A basic format and a print control file required for printing the bill/check is down loaded from a relevant file in the memory 6 to the MICR toner printer 20 and a process for printing the bill/check is executed.
